HKO contact geometry predicts local nonregular upper tails
Fixed HKO chart: 60 fresh cases
full
support
angular
Frozen prediction
Exact systolic ratio
Above one: 41 cases
median error 0.00467%
Canonical product invariant: 45 fresh cases
Frozen prediction
Exact systolic ratio
Above one: 23 cases
median error 0.00656%
Quadratic error scaling
raw contact defect
canonical invariant
proportional to ϵ^2
Median relative ratio error (%)
Perturbation scale
Canonicalization removes coordinate distortion
Systolic ratio / prediction
exact ratio
raw chart prediction
canonical prediction
Matched finite coordinate transform
